Wind max 29 mph. ave 7.8 mph.																						

Folks:

Doctor! What should I do?

Calm down now. What are the symptoms?

A steady SE winds averaging 7 MPH with gusts to 29. I've only seen this situation about 20 times so far this year. What should I dooooo?

First off don't panic. Second, don't waste time with the A rig.

Doctor! Does this mean....

Yes! Go straight to the B rig and hang on.

Then what?

Enjoy.

Larry

PS. Good sailors + good boats + good wind = great racing every time. LS
