Folks:

I'm packing for my drive to Hood River so I'll make this short. Great weather, wind to die fore and a spectacular group. Well maybe not spectacular but very good anyway.

I learned a couple of things. If the centering of your rudder is as much as a half of a millimeter off it WILL have an effect. Reading and reacting to wind changes is much more art than science and three bus loads of young school kids can be a delightful riot.

Enjoy.

Larry Stiles
