Another beautiful day at Bowman Bay. The tide was coming in all day, so the weeds were few until the last 2 races when the salad arrived. Winds were mostly from the West, but hit all of the points on the compass during the day. The wind velocity was quite variable with 0 mph to a 9 mph blast that lasted about 3 minutes.

Crab season was open, but we all got along fine and had no pots thrown at our boats. The lines were close to the dock, so they did not bother the boats. We had a lot of boat traffic with kayaks, paddle boats, canoes, etc. They also got close enough to see the boats clearly and take photos, but were courteous about giving us room to sail.

Our brand new chase boat is now on the dock! It is quite a bit larger than the previous ones, and much more stable. We should have no problem with 2 people on it, which will make the time shorter for race course adjustments and boat recoveries.

Thanks to Steve Sutton for moving the buoys in place for proper racing and rescuing a boat or two.

J Kelly Martin
