

Julian Lee reporting:

3 sailors doesn't make a regatta, add no wind and lots of weed and you have a recipe for going home. We waited out the calm and sure enough we received 13.4mph measured max and 6.0 Average wind shifting and sort of settling from the West. Not ideal for Seafarers but Paul ,Victor and I had some of the most pleasurable sailing ever.

Wednesday October 1st is predicted to have 20 mph wind speed. So install your B rig at home in readiness. If this prediction fails at least we will all be competitive. These conditions are not conducive to test sailing an IOM for the first time (Steve and Dennis) but it will be great to experience. See you Wednesday.
